Bangalore, INDIA • +91 9390286875 • chakrithabadur16@gmail.com • [LinkedIN](#)

OPEN TO RELOCATION

Biotechnology graduate with research experience in *Drosophila melanogaster* and strong interest in molecular biology and genomics. Skilled in wet lab techniques, Python, and R for biological data analysis, with proven ability to conduct experimental research and communicate findings effectively. Data documentation, QC report preparation, and genomics workflows, with a strong focus on accuracy and compliance.

SKILLS

- **Genomics & Bioinformatics Skills:** Sequence alignment (BLAST, Clustal), NGS (handling raw .ab1 files, FastQC/MultiQC), Phylogenetic tree construction (MEGA).
- **Molecular Biology, Microbiology & Immunology-specific tools:** PCR, qPCR, Gel Electrophoresis, SDS-PAGE, Hemocytometer, Antibiotic resistance selection, Western Blotting, HPLC, Good Laboratory Practices (GLP)
- **Technical Skills:** Python for Biologists, R (ggplot2, Statistics), Excel, Prism Software, Canva.
- **Animal cell culture:** Cell Passing, Drug testing, Cryopreservation and revival
- **Anti-oxidants determination specific tools:** Column Chromatography, Rotary Vacuum Evaporator, Calorimeter
- **Customer Service Skills:** Email & Chat Support, CRM Management (Zoho CRM, Zoho Desk, GallaBox, Gupshup), Inbound Reporting, Key Account Handling, Problem Solving, Multitasking, Communication.

EDUCATION

Bachelor of Technology in Biotechnology

SASTRA Deemed University, India • CGPA: 7.31

07/2019 - 06/2023

WORK EXPERIENCE

Project Management Intern

09/25 – Present

On-site • Full-time • Biokart Genomics Lab Pvt. Ltd., Bengaluru

- Collected client samples, managed documentation, and coordinated with the wet lab for NGS, Sanger, Metagenomics, and MID services; assisted in QC/MID reports, phylogenetic analysis, and learned NGS workflows including FastQC/MultiQC and read calculations under expert guidance.

Learning Manager & Sales Executive

07/23 – 05/25

On-site • Full-time • Intellipaat Software Solutions Pvt. Ltd. & Kuddle Technology Pvt. Ltd., Bengaluru

- Handled client inquiries, learner support tickets, and issue resolution with strong communication and problem-solving skills. Contributed to sales and marketing initiatives, including promoting products/services and guiding learners on LinkedIn for career growth.
- Prepared detailed reports, managed CRM systems, and developed transferable skills in data handling, reporting, and relationship management.

RESEARCH EXPERIENCE

Research Student • Full-time

06/2022 - 06/2023

Fruit Fly Lab- SASTRA Deemed University

- Investigated anti-aging compounds in plum fruit using a *Drosophila melanogaster* model; isolated bioactive compounds, performed antioxidant and food choice assays, and evaluated in vitro antioxidant effects via column chromatography and calorimetry.
- Studied the effect of plum fruit supplementation on life-history traits and behavior; conducted lifespan, fecundity and food choice assays. Activity assay using the *Drosophila* Activity Monitoring (DAM) System to identify mechanisms influencing lifespan and health parameters.

PROJECTS

Effect of Plum Fruit Supplement in Regulation of life-history Traits in fruit flies (*Drosophila melanogaster*)

- Duration: **01/23 – 06/23 fly lab**, SASTRA Deemed University
- Objective/Description: To study the impact of plum fruit supplement on life-history traits and physiological behavior of *D. melanogaster*

Identification and Characterization of anti-aging compounds in plum fruit

- Duration: **08/22–12/22 fly lab**, SASTRA Deemed University
- Objective/Description: To Examine the anti-aging effects in the fruit fly model.

Design and simulation of helical coil heat exchanger for citric acid fermenter

- Duration: **08/22–12/22** SASTRA Deemed University
- Objective/Description: To design a helical coil for maintaining the temperature inside the citric acid fermenter and also simulate the process in Super Pro software

CERTIFICATIONS

- **R Programming** – Coursera (Google) | Aug 2025
Covered R programming fundamentals, including data structures, statistical computing, and data visualization, with applications in biological research and clinical data analysis.
- **Fundamentals of Chromatography** – Bio-Rad Academy (Bio-Rad Laboratories) | Aug 2025
Learned principles, techniques, and resin selection based on protein characteristics; studied chromatography types, advantages, and limitations.
- **Molecular Laboratory Associate Internship** – BioLim Centre for Science & Technology | Jan–Feb 2025
15-day internship covering lab roles, Good Manufacturing Practice (GMP), safety protocols, experimental setup, documentation, and statistical data analysis.
- **Introduction to Forensic Science** – Coursera (Nanyang Technological University, Singapore) | Jan–Feb 2024
Studied forensic science fundamentals, case studies, chromatography, IR spectroscopy, mass spectrometry, DNA fingerprinting, and methods for determining time of death.
- **Theory & Hands-on Training in Mammalian Cell Culture** – SASTRA Deemed University | Sep 2022
Two-day workshop with practical exposure to laminar air flow chamber work, cell passaging, and cell handling techniques.
